

## ADAPTEURS ET BOUCHONS

Model	Description
2515	<b>Reducing Adapter (A75) (available in chrome, brass and plastic)</b> moulded from the same tough, red, polycarbonate material as U.F.S. Nozzles . It is strong, durable and with no scrap value, stays on the job
2501	<b>Adjust-A-Plug (PAC) (available in plastic only)</b> Here's an inexpensive protective plug for swivel connections up to 2 1/2" in diameter. It features two adjustable metal plates installed in the back of the plug, that can be easily mated with your local thread. Once adjusted to size, the metal plates are locked in place by a central metal bolt. The plug can be easily removed with a fire department spanner wrench. The plug can be re-installed in place by fire department personnel after shutdown. Supplied in standard red.
2502	<b>Breaker Cap (PBC) (available in plastic only)</b> This special moulded breaker cap is designed for quick release when every second counts. It is engineered to protect 2 1/2" swivel inlets on siamese, standpipe and sprinkler connections. It is locked in place by open eyebolts, which attach to pin lugs on swivel connections only. A sharp blow will fracture the cap and clear the connection for action. Supplied in standard red.

Model	Description
2500 1500	<b>Threaded Caps 1500 - 1 1/2" 2000 - 2" 2500 - 2 1/2" (A80) (available in chrome, brass and plastic)</b> Designed to cut the cost of petty theft, while at the same time providing maximum protection. The U.F.S. cap is available in sizes to fit 1 1/2", 2 1/2" and 3" male threads. It comes complete with sturdy, plated attaching chain, and inside gasket. The U.F.S. cap is deal for protection of interior fire valves, where theft of expensive brass parts is most prevalent.
2500U	<b>Universal Hose Cap (U250) (available in plastic only)</b> No more thread problems! The U.F.S. universal pull cap protects all threads by gripping valve or outlet on the inside of the waterway. It comes complete with sturdy plated attaching chan. Push On - Pull Off.
